Intermittent Stream			
Island Name			
Nonvisible Boundary or Feature Not Elsewhere Classified			
Inset Area		Outside Subject Area	

Where international, state, county, and/or MCD/CCD boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries. Where American Indian reservation and American Indian tribal subdivision boundaries coincide, the map shows only the American Indian reservation boundaries. Where Oklahoma tribal statistical area boundaries and American Indian tribal subdivision boundaries coincide, the map shows only the Oklahoma tribal statistical area boundaries.

- Geographic area names are followed by either their FIPS or census code.
- 1 A " " following an MCD name denotes a false MCD. A " " following a place name indicates that a false MCD exists that is coextensive with the place and has the same name and FIPS code as the place; the false MCD label is not shown.
- 2 Place label color corresponds to the place fill color.
- 3 Census tracts are identified by an up to four-digit integer number and may have an optional two-digit suffix; for example 23 or 1457.02. The census tract codes consist of six digits with an implied decimal between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros, and trailing zeros for census tracts without a suffix. The tract number examples above would have codes of 002300 and 145702, respectively.
- 4 A " " following a block number indicates that the block number is repeated elsewhere in the block.

Due to space limitations, some areas and features such as water bodies, colleges, prisons, and roads may not be labeled.
